

THE CURE OF PARALYSIS

The Case of a Veteran Cited Whose Paralysis Came from Exposure in the Army.

The Equally Interesting Method of His Cure, and His Enthusiastic Endorsement.

From the Oregon Farmer, Cooperstown, N. Y.

In the town of Oneonta, in Otsego County, New York, for a great many years there has lived a man whose life has been overshadowed by that terrible disease, paralysis. Recently it was rumored that a miracle had been performed—that this man had been restored to his normal health and strength, and to ascertain the truth or fallacy of such a rumor your correspondent visited Oneonta to-day and being directed to the man sought an interview with him, which was readily and cheerfully granted. The man told his own story as follows:

"My name is Edward Haswell. You would not think from my appearance, but I was born 77 years ago, in New Scotland, Albany County. I was reared on a farm and blessed by Nature with a strong constitution and good health. Early in life I removed to Albany, thence to Schenectady, in this county, and finally settled down in Oneonta, where I have lived a great many years. "When the war broke out I was strong and active, being nearly six feet tall and weighing 225 pounds. I enlisted in the Tenth New York Cavalry and served three years. Of the long, weary marches, especially in North Carolina of the days and nights of exposure I will not speak, for it was in the barracks at Washington that my misery began. While there heavy rains fell and we were not having sufficient protection, oftentimes we awoke in the morning drenched with the rain. At this time I contracted a cold and along with it came that dread disease, rheumatism. I rapidly grew worse and was removed to the hospital where I was attended by Dr. Leonard, now of Worcester in this county. He made me as comfortable as any man could, but I could not shake off the disease. It was in my system and after my return home with impaired health and strength reduced, my nerves gave out and additional suffering ensued. I could move around and was able to do some work—at length I went to work in the car shops here, inside work wholly—but the least exposure would bring on terrible pains and life was made miserable for me. After a few years my strength gave out and I was unable to fight against my pains. In addition to the rheumatism extreme nervousness took possession of me—then heart disease set in. I could not lie down to sleep and was brought very low by this complication of diseases. My wrists and ankles became swollen, my legs distorted and my hips sunken, now you can feel the cavity, also thrust your hand into my back—such were the ravages of rheumatism.

"But this was not all. About six years ago I had a stroke of paralysis which affected my left side—but by extra care I recovered somewhat from this. Three years ago I had a second stroke which rendered me entirely helpless. My left side was wholly useless and I could not feel it when a pin was thrust full length into my leg or arm. Before paralysis set in I thought I was nigh to death, but now I am the humor of a living death. On account of my heart trouble which was aggravated by this new disease, I could not sleep and could be placed only in one position—bolstered up in a chair reclining slightly on my right side. Now the paralysis affected my head and I would remain in that position asleep in the chair for weeks at a time without awakening. Words cannot express the misery I endured, and the suffering I endured. All this time I consulted doctors and tried all kinds of patent medicines without receiving any benefit. I was deemed to be a lingering death and was in despair. One day a paper was handed me to read. In the paper I saw an account of

the healing of a paralytic who used Dr. Williams' Pink Pills for Pale People. I had no faith in patent medicines, I had spent over \$2000 in them, all to no purpose. Unable to work I had no income save a pension of \$8.00 per month. But some way I was impressed with what Pink Pills had done and determined to give them a fair trial. I did not stop with one box, but used three boxes before I noticed any effect. After taking three boxes I felt a change coming over me. I kept on taking Pink Pills and kept on feeling better. Gradually my pain left me, I began to feel new life course through my body and to my surprise and delight, feeling began to come into my side and life and strength into my leg and arm. After taking fourteen boxes I had recovered full use of my limbs, my rheumatism was gone and my heart trouble relieved. During my sickness my weight had decreased from 225 pounds to 144 pounds, but today I weigh 170 pounds, am strong and active and you would not take me to be 77 years old."

While speaking, Mr. Haswell showed considerable emotion and when questioned he added: "I cannot say too much in praise of Dr. Williams' Pink Pills and I cannot express my gratitude to the Dr. Williams' Medicine Company, they saved my life and gave me back health I had not enjoyed for over 30 years."

When told that people might not believe such a story in print, he said: "I am willing to go before a Justice of Peace and swear to the truth, if you wish, and I shall be only too glad to answer inquiries anyone may wish to make."

Dr. Williams' Pink Pills for Pale People are an unfailing remedy for all diseases arising from a poor and watery condition of the blood, such as pale and sallow complexion, general muscular weakness, loss of appetite, depression of spirits, lack of ambition, anemia, chlorosis or green sickness, palpitation of the heart, shortness of breath on slight exertion, coldness of hands or feet, swelling of the feet and limbs, pain in the back, nervous headache, dizziness, loss of memory, feebleness of will, ringing in the ears, early decay, all forms of female weakness, leucorrhoea, tardy or irregular periods, suppression of menses, hysteria, paralysis, locomotor ataxia, rheumatism, sciatica, all diseases depending on vitiated humors in the blood, causing scrofula, swollen glands, fever sores, rickets, hip-joint disease, hunchback, acquired deformities, decayed bones, chronic erysipelas, catarrh, consumption of the bowels and lungs, and also for invigorating the blood and system when broken down by overwork, worry, disease, excess and indiscretions of living, recovery from acute diseases, such as fevers, etc., loss of vital powers, spermatorrhoea, early decay, premature old age. These pills are not a purgative medicine. They contain nothing that could injure the most delicate system. They act directly on the blood, supplying to it the life-giving qualities by causing it to absorb oxygen, that great supporter of all organic life. In this way the blood, becoming "built up" and being supplied with its lacking constituents, becomes rich and red, nourishes the various organs, stimulating them to activity in the performance of their functions, and thus to eliminate diseases from the system.

These pills are manufactured by the Dr. Williams' Medicine Company, Schenectady, N. Y., and are sold in boxes bearing the firm's trade mark and wrapper, at 50 cents a box or six boxes for \$2.50, and are never sold in bulk. They may be had of all druggists or direct by mail from Dr. Williams' Medicine Company. The price at which these pills are sold makes a course of treatment inexpensive as compared with other remedies.

When the Women Vote.
They were discussing a proposed entertainment when the caller asked: "Have you invited Miss de Veroy?" "Oh, dear, no!" replied the hostess. "I couldn't think of it for a moment." "But, my dear child, she is a charming conversationalist and a splendid dancer. She is wonderfully attractive in the ballroom." "I know it," admitted her hostess, "but you see she is an offensive partisan." "Really?" "Yes, indeed. Why, she tried to get me to vote the Republican ticket, and I couldn't for a moment think of giving her an opportunity to make converts at my dance. I've had to leave her out." "Naturally, under those circumstances," acquiesced the caller. "But how about Mrs. Wilkins?" "Not a suitable person to invite, my dear. She's not in our set at all." "I hadn't heard of that. What's the matter?" "How thoughtless of you! Why, she doesn't even vote in our ward."—Chicago Post.

DAZED ON THE DESERT.

A Man Dies of Thirst Within One Hundred and Fifty Yards of a Lake of Fresh Water.

On the burning sands of Cocopah desert, beside a lake that appears to be of the coolest and the purest of fresh water, lie the bones of an American who died of thirst, and around him are five or six holes of two or three feet in depth, which he dug with his finger nails in a frenzy of thirst. His fingers are worn off at the ends, and only his whitening bones are left to bear witness to the tragedy.

Jose Garcia, who makes a living by peddling from one little camp to another on the desert, has returned from a trip which began on Aug. 20. He left here at that time and engaged a guide at the new placer camp at Los Pichachos, below the boundary line, to take him to a mining camp in the Cocopah mountains in the heart of the desert. The guide was named Quirino Sotillo, a half breed, and with them went also Frank Cota, a Mexican. They left Los Pichachos in the afternoon, traveled all night, and by the next morning were far out on the desert. By some miscalculation they were without water, and though not lost they were bewildered as to the nearest way to a well and spent the next two days in traveling without water, becoming almost insane from thirst. On the evening of the third day they found water. They were then on the northeast side of Great Salt Lake, or Laguna Salada, that lies between the Cocopah mountains on the east and the Painted mountains on the west. The lake is about six miles wide and 20 or 30 in length, varying in size according to the season, indicating that it is fed by the gulf of California. It is very shallow and saltier than the waters of the ocean.

The three men proceeded southward between the lake and Cocopahs for a distance of ten miles or so and there encountered two Mexicans and a white man. The two former were named Margarito Angulo and Felipe Moreno, and the American's name was not learned, but from the description he is thought to be Fred Wassun, who left this city for the Cocopah placers some weeks ago. Garcia continues the story as follows:

"The men came from Los Pichachos by way of Niji and had been without water for several days, and one of them, Margarito Angulo, was already 'crazy.' He was as deaf as a post and was, indeed, around like a drunken man. He paid no attention to my guide, and we had to lay hold of him to make him drink. In a few hours he was all right. The others were in their right minds, but in a terrible condition, and as I saw their swollen tongues my own began to swell, for I had passed through the same torture only two days before, and even now my tongue swells while I think of it. We gave them water, and they soon revived and continued on their way. They were burdened with a dry washer and many tools and moved slowly, so we left them, my guide giving them directions where to find the next water."

"A few miles farther we came upon the bones of a man lying stark on the sand about 25 yards from the lake. There was no flesh left. The coyotes had found the body. One leg was gone, but the rest of the remains were there. The head lay toward the north, face upward. The whiskers were dark and turning gray, and the hair was the same. The man had worn a blue jumper, a red woolen undershirt, one boot and a brown slouch hat. I found a cheap clasp ring in his jumper pocket which contained this paper, which is a piece of an envelope or paper sack, addressed 'James Moore, paymaster A. T. and S. F., Topeka.' In the purse was also part of a greenback. There was nothing else to identify the body. The boot was about a No. 6, and the man did not seem to have been large."

Dairy and Creamery.
Professor Dean of the Ontario Agricultural college, speaking of the difference between cheese and evaporated milk, says: "The difference between cheese and evaporated milk is chiefly this—the former contains but three or four of the original compounds of the milk—viz, water about 81 per cent; fat, 81 per cent; casein, 31 per cent, and about 7 per cent of lactic acid, ash, etc., while the evaporated milk has also the milk sugar, which in cheesemaking passes off in the whey, and a varying amount of water and in some cases cane sugar."

Scientific cheesemakers at the experiment stations begin to be of opinion that cheese can be made without rennet and that this will be done in course of time, though how they are not prepared to say. The truth about aerating milk seems to be: If you want it to get cream from for butter making, do not aerate it, as this makes the cream hard to get out of the milk. Milk that is clean does not need aeration for butter making purposes. But if you sell the milk and want to get the best prices for a pure, sweet article without any food flavors or cowy odors, then aerate it.

Dairy Instructor Ball advises all creameries to put in apparatus for pasteurizing or sterilizing the cream before they churn it. This is done in Danish creameries and constitutes one reason why Danish butter is considered the best that is made.

Mix together the bulky and concentrated foods in proper proportion.

The co-operative creamery system is entirely successful in Denmark. There are over 1,000 such creameries in that country at present, each with a membership ranging from 10 to 100.

Danish farmers start a creamery by forming themselves into an association and borrowing capital on the joint security of the members. Then they build a creamery and set it going. No member is allowed to leave the association until it is free from debt. An executive committee is appointed, consisting of chairman, secretary, treasurer, auditor and directors. A general manager is hired, and he and the executive committee transact all the business and run the creamery without any meddling on the part of the stockholders.

You are an independent citizen of this commonwealth. You want good government. Oregon is a state twice as large as Iowa, with one-sixth the population. With all our "politicians" emanating from the corrupt politicians of one large city, how can the masses of the people get good government, good legislation and honest administration? By right education of the people. Besides being a good state and general newspaper for any man the Journal advocates good government. It advocates: 1. Reform of the primary and election laws. 2. A practical registration law. 3. Economical county and state government. 4. Restoration of the representative principle. 5. Reform of the constitution and all political power in the hands of the people. The way to get good government is to work for it. Will you work? No expense! Real benefit.
